

try to help me with this matter.

Do you think it would help at all if I enrolled at Richter's? How much are the fees there, and how long is the course?

Nector, I know I am asking too much of you, but could you possibly find me a job - any job - in New York so that I could support myself immediately upon my arrival there? I don't care what job it is just as long as it gives me enough money for food and living until I orientate myself there, because as you will understand I am taking this trip at my own expense and so my money will be a little limited. I would appreciate your help very much in this matter.

How is your work going? Have you done anything new as far as motion pictures are concerned? Are you still coming to Greece?

Last week we finished the picture "Holiday in Aegina" of which I was editor and assistant director. In a couple of weeks it will be shown in the first-run cinemas of Athens. I am looking forward to seeing the audience reaction to the film.

Nector, I hope to hear from you as soon as possible about the matters I asked you above because you will understand that I am waiting for this information before I can make my next move to obtain a U.S. visa and book my passage on the ship. If all goes well, we may be together in New York in a few weeks.

Sincerely, Eric Andreou.
